PROFESSIONAL SUMMARY

Cloud-native Data Engineer with expertise in architecting scalable ETL/ELT pipelines, managing data orchestration, and ensuring data quality. Proficient in a modern data stack including Apache Airflow, AWS, GCP, and Apache Spark, with a focus on optimizing database performance and automating daily data extraction across massive datasets.

TECHNICAL SKILLS

- **Data Engineering:** Apache Airflow, Apache Spark, dbt Core, Great Expectations, ETL/ELT
- **Cloud & Warehousing:** AWS (S3, RDS, Lambda), GCP (BigQuery), Snowflake, PostgreSQL
- **Languages:** Python 3.12, SQL, PySpark, Bash
- **Dev & Ops Tools:** Git, Docker, Slack API, Postman, Linux

EXPERIENCE

Data Analyst

Cosmos Sports | Thane, Maharashtra, India | Feb 2026 – May 2026

- Designed and deployed interactive player profile dashboards using Power BI, Tableau, and Excel, centralizing performance and demographic data for 50+ players to facilitate better team management.
- Conducted financial analysis on enrollment data to optimize the fee structures for youth players and coaching staff, improving pricing transparency and resource allocation.
- Delivered actionable data insights to academy stakeholders, streamlining administrative workflows and enhancing overall financial tracking.

KEY PROJECTS

Cloud-Native Job Market Intelligence Pipeline

- Automated daily ETL pipelines utilizing AWS and Apache Airflow to extract, normalize, and load over 15,000 tech job postings.
- Developed Airflow DAGs scheduling nightly extraction and S3 to RDS loading for reliable data availability.

Automated Data Quality & Anomaly Monitor

- Built a programmatic monitoring system using Great Expectations to halt ETL pipelines and fire Slack alerts on data corruption.
- Authored 40+ validation expectations across schema completeness and distributions in Snowflake and BigQuery.
- Configured checkpoints to halt Airflow DAGs upon failure, preventing silent propagation of bad data.

Supply Chain Disruption Predictor

- Joined 5-year shipping path records with hourly NOAA weather events using partitioned tables in GCP BigQuery.
- Optimized spatial data queries to feed machine learning models processing massive maritime datasets.

EDUCATION

Bachelor's of Engineering - Information Technology | 2026

A. P. SHAH Institute of Technology | Thane

Higher Secondary Certificate (HSC) | 2022

M. H. Highschool | Thane

Secondary School Certificate (SSC) | 2020

New English School | Thane

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Technical Certifications

- Google Data Analytics Professional Certificate | Google
- Microsoft Certified: Power BI Data Analyst Associate | Microsoft
- AWS Academy Graduate: Data Engineering | AWS Academy (2023)
- Data Analysis Using Python | IBM (2025)
- AI Fluency for Students | Anthropic (2026)
- Data Analytics Essentials | Cisco Networking Academy (2026)

Job Simulations & Professional Training

- Quantitative Research Simulation | JPMorgan Chase (2026)
- Markets Quantitative Analysis (MQA) | Citi (2026)
- Data Analytics Job Simulation | Deloitte (2026)
- Data Labeling Job Simulation | (2026)
